## Our Commitment

Jetson is an engineering driven, customer focused, manufacturer of Water-Cooled Chillers, Air-Cooled Chillers and Condensing Units. With years of experience in all phases of the HVACR industry, we are committed to developing and manufacturing products that are highly efficient, reliable, serviceable and cost effective.

We focus on the continuous process of product development, introducing new innovative designs, while meeting or exceeding complex efficiency and environmental standards.

At Jetson, we continuously pursue excellence in ourselves, our company and the products and services that we deliver.

## Our Products

### Modular Water-Cooled Chillers

Features a compact modular design that makes them ideal for easy replacement, retrofit, or new construction applications.

### Water-Cooled Condensing Units

Designed for quiet, high efficiency operation and built to withstand demanding continuous duty cycles.

### Scroll Water-Cooled Chillers

Designed for performance and serviceability, each chiller is factory tested to ensure proper operation in the field.

### Modular Air-Cooled Chillers

Features an industry leading small-footprint and operating efficiency. Modular design makes them ideal for easy replacement, retrofit, or new construction applications.

### Air-Cooled Condensing Units

Designed for quiet operation, serviceability, efficiency, and reliability, Jetson condensing units are applied in numerous commercial and industrial applications.

### Packaged Air-Cooled Chillers

Designed for a variety of applications ranging from maintaining comfort in a building to cooling a process, Jetson air-cooled chillers offer a combination of high efficiency, low sound levels and compact size.

### Split-System Air-Cooled Chillers

With the flexibility to install the compressor indoor or outdoor, and pre-engineered line sizes, Jetson units are designed with flexibility for the high demands of the split system market.

The full line of Jetson, highly efficient commercial products are offered exclusively through our representatives. These products range in capacity from 10 to 600 tons.
